Projects:

- 1. Disaster Preparedness & Response Education System | Project Lead | SIH 2025 – National Winner | 2025**
 - Built a scalable national platform for schools and colleges featuring interactive disaster learning modules, virtual drills using augmented and virtual reality (AR/VR), region-specific guidance, and real-time emergency alerts via Firebase FCM.
 - Architected IoT sensor integration ESP32 feeding live dashboards; led end-to-end system design aligned with government disaster management frameworks for real-world deployment.
 - **Technology Stack:** Next.js, React, Flutter, IoT, Node.js, Socket.io, AR/VR, MongoDB, Redis, Firebase
- 2. GovBuy – Government E-Procurement Platform | Project Lead | Open Group EA Competition – International Finalist | 2024–25**
 - Designed and built a full e-procurement platform for government buyers and suppliers — end-to-end tendering workflow, role-based access, and compliance-first architecture following TOGAF ADM and ArchiMate modelling.
 - Delivered an enterprise-grade, auditable system built for secure, scalable government procurement operations.
 - **Technology Stack:** MERN Stack, TOGAF ADM, ArchiMate
- 3. NagarSevak – Civic Issue Reporting & Governance Platform | Full Stack Developer | 2024–25**
 - Built an AI-powered citizen platform for reporting civic issues, corruption, and infrastructure failures — geotagged multimedia submissions with anonymous and offline-first support.
 - Integrated YOLO-based image analysis and a trust-based prioritization engine; authorities access a real-time WebSocket-powered map dashboard with auto-routing and issue resolution tracking.
 - **Technology Stack:** Flutter, React.js, FastAPI, PostgreSQL + PostGIS, YOLO, Docker, WebSockets
- 4. CyberSentinel AI – Explainable Cyber Defense Assistant | Project Lead | IndiaNext Hackathon 2026 | 2026**
 - Built a real-time cyber defense platform with a browser extension featuring a floating “Quickball” assistant that monitors web activity to detect phishing, malicious URLs, and prompt injection attacks.
 - Developed an AI-powered threat analysis pipeline with explainable insights (risk scoring, indicators, actions)
 - **Technology Stack:** React.js, FastAPI, Chrome Extension API, Google AI Studio - AI Agents, MongoDB, IoT (ESP32), WebSockets
- 5. JalSevak – Coastal Hazard Intelligence Platform | Full Stack Developer | 2024–25**
 - Developed a real-time coastal monitoring system aggregating geotagged citizen reports and AI-analysed social media signals to detect flooding, high waves, and pollution hotspots.
 - Built NLP sentiment pipelines (spaCy/Transformers) and CV models (PyTorch/TensorFlow) feeding a centralised authority dashboard with AI-generated alerts and Celery-driven async processing.
 - **Technology Stack:** Flutter, React.js, FastAPI, PostgreSQL + PostGIS, NLP, PyTorch/TensorFlow, Celery, Redis, Docker
- 6. AYUSH Startup Registration Portal | Full Stack Developer | SIH 2024 – Top 2 Finalist | 2024**
 - Developed a government-facing portal streamlining AYUSH startup onboarding — role-based access, data aggregation, user authentication, and privacy compliance built in.
 - **Technology Stack:** MERN Stack, Python
- 7. Robotic Garbage Collector | Team Lead | Final Year Project | 2024–25**
 - Designing a semi-autonomous terrain-adaptive garbage collection robot (sandy/swampy environments) with real-time object detection, servo control, and obstacle avoidance.
 - Built a Flutter app for manual remote control alongside the robot's fully automatic operation mode.
 - **Technology Stack:** Arduino Mega, ESP32, Raspberry Pi, Python, Flutter
- 8. KnoQ Smart Bat – AI Cricket Coaching System | Hardware + Software Lead | 2024–25**
 - Built an IoT-enabled cricket training system using ESP32, acceleration, gyroscope and other embedded sensors to capture real-time swing metrics (speed, impact, sweet spot) with BLE-based mobile integration.
 - Designed MediaPipe-based vision analysis to deliver AI-driven technique feedback and player performance tracking.
 - **Technology Stack:** Flutter, MediaPipe, Firebase, Python, BLE, Embedded sensors
- 9. MediScan | Project Lead | CSI Ideathon 2024 – 3rd Place Nationally | 2023–24**
 - Built a QR/barcode scanning solution delivering instant medication information (benefits, side effects, dosage) to patients — improving healthcare accessibility through a simple scan.
 - **Technology Stack:** Python, Django, Flask, QR/Barcode Generation Tools

Work Experience / Internships:

- **Data Science and Data Analytics Intern | Imarticus Learning | August 2025 – October 2025**
 - Engineered end-to-end data pipelines using **Python (Pandas, NumPy) and SQL** to clean, transform, and analyze datasets, reducing manual reporting effort and improving workflow efficiency
 - Built **interactive Power BI dashboards** to visualize business KPIs, enabled data-driven decision-making for stakeholders
 - Developed and optimized **machine learning models** (Scikit-learn) for classification and regression
 - Applied **data analysis and statistical techniques** to uncover patterns in customer and operational data, driving actionable insights
 - Integrated AI/ML experimentation and cross-domain learning to enhance model design and practical deployment understanding

- **AI, Cloud & Front-End Intern | Edunet Foundation (IBM SkillsBuild) | June 2024 – September 2024**
 - Completed hands-on training in **AI, Cloud Computing**, and **Front-End Development**, working on real-world problem statements
 - Developed an **AI-powered chatbot** using IBM Watson Assistant, enabling automated query handling and user interaction
 - Gained practical exposure to **IBM Cloud services**, including deployment, model integration, and cloud-based workflows
 - Built **interactive front-end interfaces** using modern web technologies, focusing on usability and responsiveness
 - Selected for extended participation across multiple internship tracks based on performance and project contributions
- **Full Stack Developer Intern | META Craftlab, India | May 2024 – July 2024**
 - Developed and deployed **full-stack web applications** using modern frameworks, contributing to scalable and modular system architecture
 - Worked with **Svelte and SvelteKit frameworks** to build structured backend workflows and streamline development processes
 - Collaborated in an agile team environment to deliver project modules, improving development efficiency and code maintainability
 - Built responsive UI components and integrated backend services, enhancing user experience and application performance

Skills:

- **Languages & Frameworks:** Python, JavaScript, Dart, Flutter, C++, React.js, Node.js, Express.js, Next.js, FastAPI, Svelte/SvelteKit
- **AI / ML & Data:** Machine Learning, NLP, Computer Vision, AI System Design, Power BI, Scikit-learn, PyTorch, TensorFlow, YOLO
- **Databases:** MongoDB, MySQL, PostgreSQL, Firebase, Redis, Hive
- **Infrastructure & Tools:** REST APIs, Socket.IO, WebSockets, Docker, IBM Cloud, Git/GitHub, Figma, Canva
- **IoT & Embedded Systems:** ESP32, Arduino Mega, Raspberry Pi, C++ (Embedded), PCB Design
- **Architecture & Methodology:** TOGAF ADM, ArchiMate, OOP, Agile, Algorithm Design, Database Management, Technical Documentation
- **Leadership & Soft Skills:** Project Management, Team Leadership, Public Speaking & Pitching, Mentorship, Strategic Problem-Solving, Critical Thinking, Adaptability, Negotiation
- **Languages:** English, Hindi

Volunteering Experience:

- **President → Core Committee → Student Member | CSI, VSIT Student Branch | Sep 2023 – Nov 2024**
 - Rose from Student Member to President within a year — led a 170+ member drive, drove a 65% rise in student participation, and represented VSIT at intercollegiate events.
 - Organized a National Level research paper competition, multiple workshops, and spearheaded technical projects including MediScan; built industry partnerships and mentored student teams.
- **Core Graphics Team Member | TechVista Committee, VSIT | Jan 2024 – Dec 2025**
 - Designed event promotion materials and managed logistics across multiple college events for smooth execution.

Education:

1. **Bachelor of Science in Information Technology | Vidyalankar School of Information Technology, Mumbai | 2023-2026 (3 years)**
2. **HSC (12th) | Mahatma Phule Education Society, Mumbai | 2021-2023**
3. **SSC (10th) | Our Lady of Good Counsel High School, Mumbai | 2021**

Certifications:

- [Google Cloud Skills Boost badges in : Generative AI | Large Language Models | Vertex AI | Image Generation | MLOps etc.](#)
- [Getting started with Google Workspace | Google Cloud](#)
- [TCS iON Career Edge - Young Professionals | TCS iON](#)
- [Security and Privacy of Big Data | Cofoundedly by European Union](#)
- [Google Professional Workspace Administrator | Google Cloud](#)
- [Cloud Computing 101 | Learn Quest](#)
- [Journey to Cloud | IBM](#)
- [Enterprise Grade – AI | IBM](#)
- [Getting Started with Artificial Intelligence | IBM](#)
- Microsoft Office and Excel Programs:
 - [Google Sheets - Advance Topics | Google Cloud](#)
 - [Advance Spreadsheet Program | Keerti Computer Institute](#)
 - [Doing more with Google Sheets | Google Cloud](#)

Achievements and Awards:

- **First Place | Smart India Hackathon 2025 – Grand Finale | Project: Disaster Preparedness & Response Education System (Government of Punjab, Ministry of Education)**
- **First Place | Internal SIH-2025, VSIT | Project: Crowdsourcing Civic Issues (Government of Jharkhand)**
- **Finalist | The Open Group INITIATE EA Competition 2025 (International) | Project: GovBuy – Government Procurement Platform**
- **First Place | MechNova, Robo-Making Competition 2025 | Project: Universal Terrain Cleaning Robot**
- **Finalist | Smart India Hackathon 2024 | Problem: AYUSH Startup Registration Portal**
- **Third Place | National-Level CSI Ideathon 2024 | Project: MediScan**
- **First Place | Internal SIH-2024, VSIT | Project: Innovation Excellence Portal (AYUSH)**
